

Simple pricing. One shop, one flat price.

No per-staff fees. No commission on your customers. Software only: your team uses the phones and computers they already have.

STEP 1 · ONE TIME

Setup

\$500

For shops that work the way the system already works.

- Your shop name, logo and colors
- Your services, prices and durations
- Your staff and who does which service
- Opening hours and staff days off
- Booking website in Khmer and English
- Your own Telegram bot
- Your old customer list moved in
- Training for you and your staff

STEP 2 · EVERY MONTH

Care plan

\$200 / month

- Any number of staff, same price
- Hosting, web address and padlock (HTTPS)
- Backups every hour + a nightly encrypted copy off-site
- Small changes (menu, prices, opening hours, staff): **done within 24 hours**
- Fixes when something doesn't work
- Security updates and bug fixes
- A real person to call, in Khmer or English

Not included

- Hardware (phones, tablets, computers, printers)
- Card payments or a till: the system records bookings, not payments
- SMS messages (customers get email; the owner gets Telegram)
- Source code, installers, or running it on your own server

Need something different?

If your shop needs a new feature or works in a different way (for example a new report, deposits, or a different booking flow), we look at it together first. You get a **separate price and a time plan** before any work starts. Not included in setup or the care plan.

Fully managed, nothing to install. We host and run everything on our servers; you use it in your browser and on Telegram. **Your data stays yours:** export your customer list and reports any time.

How to start

1 · Demo

See the system live, 15 minutes.

2 · Agree

We list your services, staff and hours together.

3 · Setup

We build your version and move your customers in.

4 · Go live

We train your team and stay with you.
